

**MAPPING
THE
SUBSURFACE
FROM THE
AIR**

Drone Services

*specialised drone surveys
with professional drones*

Drone Services

Mapping the subsurface from the air

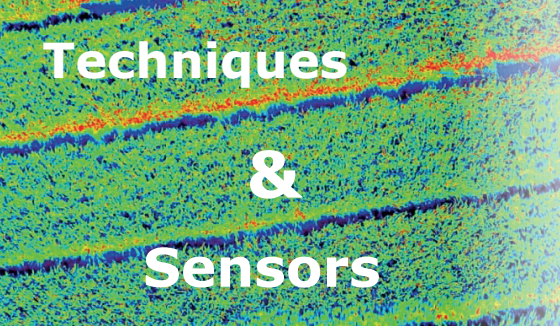

Advantages of using a DRONE

- Lower risk of work accidents
- No need for shut-down during inspection
- Better overview
- Inaccessible locations made accessible
- Improved data density
- Faster data acquisition
- Higher data resolution
- Lower costs

Our Services

- Inspection and monitoring
- Archeological research
- Crop monitoring
- UXO investigation
- Geophysical surveys
- Environmental surveys
- Geothermal research
- Mining

Techniques & Sensors

- Video
- Photogrammetry
- Corona camera
- Infrared (IR) thermography
- Infrared (IR) spectrometry
- EM induction
- Magnetometer & gradiometer
- LiDAR
- GPR
